

# 1. BRAINSTORMING & IDEATION

## User Story / Problem Context

- Courier and logistics companies face difficulties managing shipments and deliveries because of manual processes and disconnected systems.
- The absence of centralized tracking causes delayed delivery updates and poor customer visibility.
- Manual delivery-agent assignment can create scheduling conflicts and operational delays.
- The lack of automated notifications and performance analytics limits communication and managerial insight.

## Customer Problem Statements

- PS-1 – Branch Manager: wants to manage shipments efficiently, but tracking is manual because systems are disconnected, which causes stress.
- PS-2 – Customer: wants to track parcels, but updates are delayed because there is no centralized system, which creates uncertainty.

## Empathy Map – Branch Manager

- Think & Feel: Concerned about delays and errors.
- Hear: Customer complaints.
- See: Registers and spreadsheets.
- Say & Do: Manual follow-ups.
- Pain: Delivery conflicts and missed updates.
- Gain: Automated tracking and dashboards.

## Brainstorming & Idea Prioritization

- Ideas considered: manual registers, spreadsheet tracking, standalone portal, and Salesforce CRM.
- The project selected Salesforce CRM for automation, scalability, and real-time visibility.
