

3. PROJECT DESIGN

Problem–Solution Fit

- CMS addresses fragmented courier operations by centralizing shipment tracking, delivery assignment, billing, and reporting in Salesforce.

Proposed Solution

- Problem: Manual shipment management. Solution: Salesforce CMS.
- Innovation: Automated tracking and billing.
- Impact: Faster deliveries.
- Business model: Courier services.
- Scalability: Multi-branch ready.

Solution Architecture

- Customer Object
- Shipment Object
- Delivery Agent Object
- Branch Object
- Delivery Update Object
- Invoice Object
- Flows
- Reports
- Dashboards

Key Relationships

- Customer → Shipment: Lookup
- Shipment → Delivery Agent: Lookup
- Delivery Agent → Branch: Lookup
- Delivery Update → Shipment: Master-Detail
- Invoice → Shipment: Lookup
